

In music class quarter 1, we have learn about the composition of the music, and in quarter 2 we use that knowledge to compose our own music. We started with the instrument sound, chose instruments, and compose our own piece. After that, we started this project. It is a project about, compose our own piece by our own record. There are 3 topics that we can choose. The first one is generate the popular music, choose the popular music and recreate the sound. The second one is Sound Scape, choose picture and imagine what sound could be in that figure, and the last one is Foley, which is the one that I chose. The Foley is represent the story line, I chose to create the story about everyday life.

In my work I chose the Foley because it fit with my theme the most. As I mentioned I chose everyday life to be my theme, so I think about my life as a story, I created the story line, then think about which sound would fit with those activities. In the beginning of the project, we as a class went to record the sound around our school and in the Mahidol University, according to that, it is one of the reason why I choose this theme, the sound around the school is a sound of an environment that we live in almost everyday, but the biggest reason why I chose this theme is, I wanted to show how our life is. Our life continues in lope, with nothing new. The same activities, same problems such as the pollution problem and cannot find solution. I wanted to reflect how boring our life is, to encourage people to find something new, and make our life worth to live. I started with the alarm clock, which wake us up in every morning, and ended with the closing door sound to be a symbol of the end of the day.

The thing that I like in this project is, in this project, I not only created my own piece, but I also generated my thought though the music, and thinking about the sound that are in our normal life. Besides that, I a little bit confused during the work, but at the end I can figure it out.
